For me, the purpose of web development is not only the code but also making it easy for others to use. It is cool to create processes where responsibilities and knowledge are shared and not tied to a particular person. That's why, along with features coding, I like to build CI&CD, write documentation and help juniors to get into the flow.

EXPERIENCE

- | | | |
|----------------|---|------------------|
| 2023 Jun – now | Senior Frontend Developer
Working hard (and having fun) on re-launching huge legacy project with modern technologies. <ul style="list-style-type: none">• Set up processes for migrating between legacy and modern systems (business-, technology- and knowledge-wise)• Development of a headless CMS Next.js project with A/B testing and country-specific logic• Development of an internal library of UI components• Maintenance of the public JS client library for the company API TS / Next.js / GitLab CI
UX / Redux :c / Builder.io CMS | TimeTac |
| 2022 – 2023 | Senior Frontend Developer
Creating e-commerce frontend and contributing to an internal web framework.
TS / SAP Commerce Cloud / GitLab CI | Netconomy |
| 2021 – 2022 | Frontend Developer & Kinda DevOps Engineer
As part of the JoomPro team, I developed client, merchant and administrator apps. <ul style="list-style-type: none">• International client app development in close cooperation with business• Developed an internal analytics system with custom events sending and handling• JoomPro blog development (WordPress theme and CORS & infrastructure for interacting with core services)• Handled many infrastructure tasks, Traefik -> Nginx TS / Next.js / Effector
i18n / MongoDB / Jenkins / Kubernetes | Joom |
| 2018 – 2021 | Frontend Developer
Initially worked in the Market Research & Analytics team and then moved to JetStat. Gained extensive experience in data analysis and BI tools. <ul style="list-style-type: none">• Developed an internal BI system based on Metabase (custom features and D3 visualizations)• Developed and maintained an internal React UI kit + several SPAs built with it• Created custom dashboards integrating multiple data sources, filters and breakouts (JavaScript + React + Effector)• Implemented dashboards configuration-as-code using Kotlin DSL and publishing to S3 TS / React / Redux / Effector / D3
Kotlin / TeamCity / Kubernetes | JetBrains |

EDUCATION

- | | | |
|-------------|---|---|
| 2016 – 2020 | Bachelor's Degree
Hardware-focused Computer Science and Engineering program.
Wrote thesis on a web-based contest system for teams.
Most interesting courses: computer networks, OS architecture, microprocessors. | National Research Nuclear University MEPhI |
